Gentlemen:

Subject: NOTICE OF TENTATIVE APPROVAL - M/045/0077

Attached is a Notice of Tentative Approval from the Division of Oil, Gas and Mining, Department of Natural Resources, State of Utah.

It is requested that this notice be published ONCE ONLY as soon as possible, but no later than the 16th day of February 2010. In the event that said notice cannot be published by this date, please notify me immediately by calling 538-5291.

Upon completion of this request, please send proof of publication and statement of cost to the Division of Oil, Gas and Mining, 1594 West North Temple, Suite 1210, Box 145801, Salt Lake City, Utah 84114-5801; phone (801) 538-5340.

Sincerely,

Penny Berry
Minerals Secretary

BEFORE THE DIVISION OF OIL, GAS AND MINING
DEPARTMENT OF NATURAL RESOURCES
STATE OF UTAH

---ooOoo---

IN THE MATTER OF TENTATIVE
DECISION TO APPROVE A LARGE
MINING AND RECLAMATION PLAN
FOR GENEVA ROCK PRODUCTS,
NORTH GRANTSVILLE QUARRY,
UTAH COUNTY, UTAH

:
:
:

NOTICE OF TENTATIVE
DECISION TO APPROVE

NO. M/045/0077

---ooOoo---

Notice is hereby given by the Division of Oil, Gas and Mining, of its tentative decision to approve the Large Mining Operations Notice of Intention for Geneva Rock Products, North Grantsville Quarry. Mining activities will affect the following area: Portions of Sections 16, 17, 18, 19, and 20, Township 2 South, Range 6 West, SLBM, Tooele County, Utah.

Geneva Rock Products has filed a Notice for a large mining operation. Reclamation surety will be provided to the Division for the proposed 95 acres of disturbance. Excavation will first be into alluvial gravels, but will quickly move into limestone. These materials will be used to produce crushed or screened aggregate for construction materials. During the operation, following topsoil salvage, rock will be drilled, blasted and removed in lifts about 50 feet deep. After mining, all facilities will be removed and the site will be returned to a grazing and wildlife habitat postmining land use. The complete Notice may be viewed at the Division's Public Information Center.

Any person or agency aggrieved by this tentative decision to issue approval is hereby requested to submit written protest within thirty (30) days of the date of publication to Dana Dean, P.E., Associate Director of Mining, Division of Oil, Gas and Mining, 1594 West North Temple, Suite 1210, Box 145801, Salt Lake City, Utah 84114-5801, setting forth factual reasons for the complaint.

DATED THIS 11th day of February, 2010

STATE OF UTAH
DIVISION OF OIL, GAS AND MINING

Dana Dean, P.E.
Associate Director, Mining

CERTIFICATE OF MAILING

I hereby certify that I caused a true and correct copy of the foregoing Notice of Tentative Decision to Approve the Large Mining Notice of Intention for Geneva Rock Products, North Grantsville Quarry, M/045/0077 to be sent via facsimile, electronic mail, or mailed by first class mail, postage prepaid, the 11 day of February, 2010 to:

EXECUTIVE SUMMARY

Date Summary Prepared: February 8, 2010

Mine Name: North Grantsville Quarry	I.D. Number: M/045/0077
Operator: Geneva Rock Products	Date Original Notice Received: September 23, 2009
Address: 1565 W, 400 N. P. O. Box 538 Orem, Utah 84059	County: Tooele New/Existing: New LMO Mineral Ownership: Fee
Contact Person: Mike Edwards	Surface Ownership: Fee
Telephone: 801-802-6900	Lease No.(s): N/A

Life of Mine: About 40 years

Legal Description: Portions of Sections 16, 17, 18, 19, and 20, Township 2 South, Range 6 West, SLM

Mineral(s) to be Mined: Excavation will first be into alluvial gravels but will quickly move into limestone. These materials will be used to produce crushed or screened aggregate for construction materials.

Acres to be Disturbed: About 95 acres would be disturbed during the first ten years of operations. Over the life of mine, the operator would disturb 539 acres.

Present Land Use: Rangeland and wildlife habitat.

Postmining Land Use: Rangeland and wildlife habitat.

Variances from Reclamation Standards (Rule R647) Granted: None.

Soils and Geology

Soil Description: Textures of the soil samples range from clay loam to sandy clay loam to loam. There are no restrictions on salvaging soil because of concerns about the chemistry. Fertility is relatively good for rangeland soils. Soils are fairly high in gravels and cobbles, and the depth to bedrock for the Amtoft-Rock Outcrop Complex is about 16 inches. pH values range from about 7.3 to about 7.6.

Special Handling Problems: The Amtoft-Rock Outcrop Complex is the predominant soil, and it averages 16 inches thick before reaching bedrock. Nevertheless, the operator expects to be able to salvage an average of about six inches of soil over the entire area.

Geology Description: The mine is located in the Basin and Range Physiographic Province. The mine will have a thin veneer of alluvial material and be underlain predominately by Orche Mountain Limestone that is Mississippian in age and is equivalent to the Great Blue Limestone. The stratigraphy in the area strikes north-south and dips to the east at 80 degrees from horizontal.

Hydrology

Ground Water Description: It is not expected that groundwater will be encountered at the maximum extent of mining. The floor of the mine is currently planned to be above 4700 ft mean sea level.

Surface Water Description: Any storm water runoff coming from affected lands will be collected in the storm water retention basin or within the quarry confines, which, at a minimum, will be sized for the 10-year, 6-hour event.

Water Monitoring Plan: It is not expected that groundwater will be encountered.

Ecology

Vegetation Type(s); Dominant Species: The dominant species include sagebrush, snakeweed, bluebunch wheatgrass, Nevada bluegrass, and a few forbs typical of dry areas with well drained soils. Cheatgrass is scattered throughout the area and is a major component on the lower elevation slopes on the north end of the area.

Percent Surrounding Vegetative Cover: 47 percent desirable species and 10 percent weedy species for a total of 57 percent vegetation cover.

Wildlife Concerns: No threatened or endangered species are known to occur in the area. The Utah Natural Heritage Program database does not list any records of species of special concern within one mile of the project area, but it is possible there is some use by kit foxes and ferruginous hawks. Pygmy rabbits and short-eared owls might also use the area although it is not ideal habitat for these species.

Surface Facilities: Surface facilities include a jaw crusher and secondary and tertiary crushing units, sizing screens, a wash plant, scales and scale house, fuel and water storage tanks, an asphalt plant, and mine roads.

Mining and Reclamation Plan Summary:

During Operations:

Following topsoil salvage, rock will be drilled, blasted and removed in lifts about 50 feet deep. The material is removed to a processing area where it is crushed and screened. Blasting will be done by a contractor in accordance with MSHA requirements. Crushers and plants will initially be operated with Temporary Relocation Permits from the Division of Air Quality, but permanent site permits will be obtained as business increases. All roads and materials will be sprayed to control fugitive dust. Conveyors are equipped with spray bars that spray water at drop points to control dust. Appropriate gates and warning signs will be located at public access points and other locations. Deleterious or potentially deleterious materials will be kept in designated storage areas.

After Operations:

When mining is complete, the site will be returned to a grazing and wildlife habitat postmining land use. All facilities will be removed and any remnants of material stockpiles on the quarry floor will be graded across the floor. The quarry floor will be graded to create a slightly rolling surface. It will then be ripped 18 inches deep followed by distribution of soil and seeding.

Highwalls and sidewalls will have overall slopes of 1H:1V with 40-foot highwalls laid back 15 feet and 25-foot benches. The benches will be covered with soil where possible then seeded. Steep slopes between the benches will not be covered with soil or seeded.

The seed mix includes a mixture of native and introduced species that should help reduce establishment of cheatgrass.

The stormwater retention basin will be backfilled and graded, but this will be the last area reclaimed to minimize the chance for off-site sedimentation. A five-acre area at the lowest point of the quarry will not be covered with topsoil and will be drilled and shot 20 feet deep to fluff the bedrock and create a sump that will facilitate percolation of accumulated stormwater into the substrate. Drainages flowing over the highwalls into the quarry will be lined with rock to prevent erosion.

The access road is a county road, and it will be reclaimed to its current condition as a county road.

Surety

Amount: \$1,010,000

Form: Yet to be determined

Renewable Term: Five years

Subject: Tentative Approval to Commence Large Mining Operations, Geneva Rock Products, North Grantsville Quarry, M/045/0077, Tooele County, Utah

Dear Mr. Edwards:

The Division has completed a review of your latest response regarding your Notice of Intention to Commence Large Mining Operations (Notice), received February 4, 2010. The Division is now prepared to tentatively approve the Notice for the North Grantsville quarry. The notice of tentative approval will be published in the appropriate Salt Lake City and Tooele County newspapers (copy attached). This will begin a 30-day public comment period. The Division will also notify the Resource Development Coordinating Committee (RDCC).

If no substantive comments are received during the public comment period, the Division will then issue its final approval for this project. Changes to the Notice may be needed if substantive comments are received.

Prior to issuing final approval, we require that you provide us with a Reclamation Contract (Form MR-RC) and reclamation surety in the amount of \$1,010,000. Please contact Penny Berry at 801-538-5291 or by e mail at bondcoordinator@utah.gov to obtain the appropriate bond and reclamation contract forms.

If available, the Division requests that you provide an electronic copy of the mine disturbed area in the original AutoCad, shape, or other file format. Please include the projection and datum information with this file. Contact danielsmith@utah.gov, (801)538-5292 for further information or with questions.

Mike Edwards
